Congratulations! We have approved your organization for a Microsoft Elevate Deployment Booster program voucher. Your organization is qualified to receive a voucher valued at **\$8,400** in services credit with an **eligible partner** that can be used for M365 Copilot and/or M365 Security Suites deployment services.

This must be used for deployment services with an **eligible Elevate Deployment Booster Partner** (click link to download list) of your choice, for the **Eligible Workloads** (listed above) by the **Expiration Date** indicated.

Microsoft does not guarantee extensions of this voucher's validity beyond the Expiration Date. This voucher may be redeemed for only one Statement of Work (SOW). If the SOW exceeds the voucher value, your organization will be responsible for all fees in excess of the voucher value. If the SOW is less than the voucher value, your organization will forfeit the remaining voucher value.

Next Steps: If **TestEDB** elects to redeem this voucher, follow these steps:

- Promptly select an **eligible Elevate Deployment Booster Partner** (click link to download list) if you're not already working with one. Your account team can help you connect with a partner if needed.
- Present this voucher to the Partner you selected. They will redeem it with Microsoft for payment.
- Develop a SOW with your selected Partner.
- Complete your engagement by the voucher **Expiration Date** indicated above.

We hope these funds help your organization accelerate M365 Copilot and/or M365 Security Suite deployment, improve readiness, and unlock value from your Microsoft services investment.

Note for Elevate Deployment Booster Partners!

- This voucher can be redeemed as outlined in the **Elevate Deployment Booster Voucher Program Terms and Conditions**. Ensure that you are eligible to redeem this voucher.
- Once you've received this voucher, promptly engage with your customer to complete and submit the signed SOW. Delays can impact voucher eligibility and will reduce time to redeem the voucher. The SOW must be approved by Microsoft before delivery of the work is started.
